Learning Outcomes

On completion of this course, learners will be able to:

- LO1: Describe the AI landscape from generative AI to AI agents, and identify high-value AI use cases across the retail value chain.
- LO2: Use AI assistants such as ChatGPT, Claude, Microsoft Copilot and Google Gemini to complete everyday retail tasks with well-structured prompts.
- LO3: Generate on-brand product descriptions, marketing copy and product visuals with AI, and check them before they reach a customer.
- LO4: Apply customer data privacy, governance and responsible-AI practices when using AI tools on retail data.
- LO5: Deploy AI for customer service, personalised recommendations and targeted promotions in a retail setting.
- LO6: Apply AI to demand forecasting, inventory planning, pricing, merchandising and sales analytics, and build simple AI workflows for daily retail tasks.

Learning Reinforcement

- Every topic is followed by hands-on labs that learners complete on their own machine.
- Each lab ends with a 'Test it' verification step so learners can confirm their own progress.
- The trainer circulates during lab time to give individual feedback and unblock learners.
- Each topic closes with a recap mapped back to the course learning outcomes.
