About the Trainer

Dr Alfred Ang

Principal Trainer
Tertiary Infotech Academy Pte Ltd

ROLE

Principal Trainer, Tertiary Infotech Academy Pte Ltd

EXPERTISE

eCommerce, digital marketing, data analytics and AI — 20+ years of training and industry experience.

DELIVERS

Courses on eCommerce (Shopify, WooCommerce), SEO, digital marketing and web development.

FOUNDER

Founder of Tertiary Infotech Academy / Tertiary Courses.

Let's Know Each Other

1

Who you are

Your name and your organisation / role.

2

Your store

Do you already sell online — or what do you plan to sell?

3

Your experience

Any experience with Shopify, other eCommerce platforms or web tools?

4

Your goal

What do you want your store to achieve after this course?

Ground Rules

1

Set your mobile phone to silent mode.

2

Participate actively — no question is stupid.

3

Mutual respect: agree to disagree.

4

One conversation at one time.

5

Be punctual; return from breaks on time.

6

Exit silently for calls or toilet breaks.

7

Full attendance — attend the whole day to get the most from the course.

8

Have fun and build a real store!

Keep them open — you
will use them in every
lab

SCHEDULE

Lesson Plan — 1 Day

Morning

- Morning — Store Setup & Products (9:30am – 12:30pm)
 - Welcome · introductions · course outline
 - Topic 1: Getting Started on Shopify (Lab 1)
 - Topic 2: Setting Up Products (Lab 2)
 - Lunch break (12:30pm – 1:00pm)

Afternoon

- Afternoon — Theme, Orders, Payments & Marketing (1:00pm – 5:30pm)
 - Topic 3: Customizing Theme (Labs 3–4)
 - Topic 4: Managing Orders (Lab 5)
 - Topic 5: Payment and Shipping (Labs 6–7)
 - Topic 6: Marketing and Performance (Labs 8–9)
 - Course recap, Q&A and course feedback

Course Outline — 6 Topics

1

Topic 1 · Getting Started on Shopify

Overview of Shopify · basic store configuration

2

Topic 2 · Setting Up Products

Products, details, SEO metas, variants

3

Topic 3 · Customizing Theme

Find, publish and customise a theme; collections; pages

4

Topic 4 · Managing Orders

View, fulfill, manage, refund and cancel orders

5

Topic 5 · Payment and Shipping

Payments, fraud, taxes, shipping and dropshipping

6

Topic 6 · Marketing and Performance

Marketing plan, SEO, discounts, analytics

ECOMMERCE ESSENTIALS

Why Shopify?

WHAT IS SHOPIFY

Shopify lets anyone set up an online store and sell.

One of the world's most popular hosted eCommerce platforms — no servers, no code required. · <https://www.shopify.com.sg/>

Shopify Features

1

Themes

Free and paid themes from the Theme Store make your store stand out.

2

Apps

Free and paid apps from the App Store expand your store's functionality.

3

Payments

Shopify's own payment provider accepts credit cards out of the box.

4

Sales channels

Grow with online store, POS, social and marketplace channels.

5

Guides & experts

The Shopify blog and worldwide experts help you set up, design and market.

6

24/7 support

A dedicated support team answers questions on every plan.

Shopify Success Stories

Mollyjogger

- Outdoor heritage goods
- www.mollyjogger.com
- Niche brand storytelling

Miss Boon

- Curated lifestyle boutique
- missboon.ca
- Clean, image-led design

The Citizenry

- Artisan home décor
- www.the-citizenry.com
- Premium visual merchandising

Shopify Pricing Plans

Basic

- For solo sellers starting out
- Online store + unlimited products
- Basic reports · 2 staff accounts

Shopify

- For growing businesses
- Professional reports
- Lower transaction fees · 5 staff

Advanced

- For scaling businesses
- Advanced report builder
- Best shipping rates · 15 staff

Before You Start — Know Your Goals

What products?

What exactly are you selling — physical, digital, services?

Who is it for?

Who is your target audience and where do they shop?

Which channels?

Online store, social, marketplaces, POS — where will you sell?

Which plan?

Match the pricing plan to your stage and sales volume.

TOPIC 01

Getting Started on Shopify

Overview of Shopify eCommerce · Basic store configuration

Key Concepts — Getting Started on Shopify

1

Shopify is one of the most popular hosted eCommerce platforms — anyone can set up an online store and sell products without managing servers or code.

2

Understand your goals before you build: what products you sell, who your target audience is, which sales channels you need and which pricing plan fits.

3

Basic store configuration covers the store name, legal business address, time zone, billing, currency, weight unit, shipping, taxes and your domain.

4

Store policies, staff permissions and content guidelines govern who may publish and change content on the store (content management policies).

5

Home page metadata (title + meta description) is what shoppers see on the search results page — unique, descriptive metadata attracts clicks.

6

Order IDs default to #1001, #1002 ... — you can brand them with a custom prefix or suffix in Settings → General.

Basic Store Configuration Checklist

1

Name your store and set a password page

2

Legal business name and address

3

Time zone, currency and weight unit

4

Billing information

5

Payment gateways

6

Shipping zones and rates

7

Taxes for your selling regions

8

Your custom domain

Home Page Metadata & Order IDs

Be found

- Home page metadata
 - Title + meta description shown on Google results
 - Doesn't change ranking — but wins the click
 - Unique and descriptive for every page
 - Online Store → Preferences

Look professional

- Branded order IDs
 - Orders start at #1001 and increment by 1
 - The start number is fixed — the prefix/suffix is yours
 - e.g. SG-1001 or 1001-WEB
 - Settings → General → Standards and formats

Grow Your Store — Themes & Apps

Look

- Shopify Theme Store
 - themes.shopify.com
 - Free and paid themes by industry
 - Filter by collection, features, price

Function

- Shopify App Store
 - apps.shopify.com
 - Marketing, shipping, reviews, upsells
 - Install only what you need — apps add cost and weight

Set Up Your Shopify Store

LAB 1

Create your own Shopify trial store and complete the basic store configuration — store details, address, time zone, currency, weight unit, home page metadata and a branded order ID prefix.

You'll build

A live Shopify trial store with correct store details, standards and formats, home page metadata and a custom order ID format.

Tools: Shopify admin, Shopify free trial, web browser

Lab 1 at a Glance

Set Up Your Shopify Store

Test it

Open Settings → General and confirm the store name, Singapore time zone, SGD currency and your custom order ID prefix are saved. Open your storefront preview and confirm the store loads with your store name in the browser tab.

 Full click-by-click steps: Learner Guide — this lab's Step-by-step section.

Recap — Getting Started on Shopify

- You can now: LO1 — Setup Shopify eCommerce store and CMS
- Key concepts: Overview of Shopify eCommerce · Basic store configuration.

TOPIC 02

Setting Up Products

Add products · Product details · Search engine metas · Variants

Key Concepts — Setting Up Products

1

Products are the goods, digital downloads, services and gift cards you sell — each with a title, description, media, pricing, inventory and shipping details.

2

A well-curated product page pairs quality images with benefit-led descriptions — it is your 24/7 salesperson.

3

The search engine listing (page title ≤ 55 chars, meta description, URL handle) controls how the product appears on Google.

4

Tags are searchable keywords that help customers find products and power automated collections.

5

Variants capture every combination of options (size, colour, style) — up to 3 options and 100 variants per product, each with its own price, SKU and image.

6

Publish each product to the right sales channels (online store, POS, social) from the product availability panel.

Anatomy of a Product Page

What the customer sees

- Story & media
 - Title and benefit-led description
 - Media: images, video, 3D
 - Search engine listing preview
 - Organization: type, vendor, collections, tags

What the business needs

- Commerce data
 - Pricing: price, compare-at, cost per item
 - Inventory: SKU, policy, quantity, incoming
 - Shipping: weight, origin, fulfillment
 - Variants and sales-channel availability

Product Variants

1

Options

Up to 3 options per product — e.g. size, colour, style.

2

Combinations

Every option combination is a variant — up to 100 per product.

3

Per-variant data

Each variant carries its own price, SKU, barcode, image and stock.

4

Manage centrally

See and edit all variants on the product page or the Inventory page.

Create Products with Variants

LAB 2

Stock the store two ways: bulk-import the course's mock product catalog (labs/data/mock-products.csv — 6 ready-made products with variants), then add a shirt product manually with a complete product page — title, description, images, pricing, inventory, Colour and Size variants, search engine listing, tags and sales channels.

You'll build

A stocked store: 6 imported mock products plus a fully-curated shirt with Colour/Size variants, SEO listing, tags and sales channels.

Tools: Shopify admin — Products, CSV product import, product images, SEO listing editor

Lab 2 at a Glance

Create Products with Variants

Test it

The Products page must list the 6 imported mock products plus your shirt. On the storefront, the shirt's Colour and Size selectors must switch price and image per variant, and the Google preview in Edit website SEO must show your custom title and description.

 Full click-by-click steps: Learner Guide — this lab's Step-by-step section.

Recap — Setting Up Products

- You can now: LO2 — Curate product and web content on Shopify store
- Key concepts: Add products · Product details · Search engine metas · Variants.

TOPIC 03

Customizing Theme

Choose · Publish · Structure · Theme settings · Code · Collections · Pages

Key Concepts — Customizing Theme

1

A theme defines the look and feel of your store — spa products want relaxed and luxurious; electronics want energetic and sleek.

2

The Shopify Theme Store offers free and paid themes, filterable by industry and collection; you can hold up to 20 themes but publish only one.

3

Every theme shares a common structure — page elements (header, body, footer, navigation) and page types (home, collection, product, cart, blog, customer).

4

The theme editor customises content, layout, typography and colours with zero code; edit Liquid/HTML/CSS only when a setting does not exist.

5

Collections group products for browsing — an automated 'All' collection controls the order of your catalog page.

6

Standard pages such as Contact Us use built-in templates (page.contact) so every store gets a working contact form.

From Theme Store to Live Storefront

EVERY THEME SHARES THIS SKELETON

Structure of a Theme

Elements

- Page elements
 - Header and navigation
 - Body content sections
 - Footer

Pages

- Page types
 - Home · Collection · Product
 - Cart · Checkout
 - Article · Blog · Customer pages

Theme Settings You Can Customise — No Code

1

Homepage sections — hero, featured products, rich text

2

Colours and typography

3

Logo and favicon

4

Social media links and sharing

5

Newsletter sign-up section

6

Recommended products / Google Maps API key

Install and Customize a Theme

LAB 3

Browse the Shopify Theme Store, install a new theme, publish it, then use the theme editor to brand the store — logo, banner, colours, fonts and social media links — without touching code, and peek at the theme code editor.

You'll build

A published, branded theme with your own logo, hero banner, colour scheme, typography and social media links.

Tools: Shopify Theme Store (themes.shopify.com), theme editor, theme code editor

Lab 3 at a Glance

Install and Customize a Theme

Test it

Open the storefront preview: your logo, banner, brand colours, fonts and social icons must all be live on the published theme.

 Full click-by-click steps: Learner Guide — this lab's Step-by-step section.

Create a Collection and a Contact Us Page

LAB 4

Control the catalog page with an automated 'All' collection, then add a Contact Us page using the built-in page.contact template so customers can reach you.

You'll build

An automated All collection ordering your catalog page, plus a working Contact Us page with a built-in contact form.

Tools: Shopify admin — Collections, Pages, page.contact template

Lab 4 at a Glance

Create a Collection and a Contact Us Page

Test it

Open the storefront: the Contact Us link must appear in the main menu and the page must show a working contact form (Name, Email, Message). Submit a test message to yourself.

 Full click-by-click steps: Learner Guide — this lab's Step-by-step section.

Recap — Customizing Theme

- You can now: LO3 — Improve customer experience by customising Shopify theme
- Key concepts: Choose · Publish · Structure · Theme settings · Code · Collections · Pages.

TOPIC 04

Managing Orders

View · Fulfill · Manage · Refund and cancel

Key Concepts — Managing Orders

1

When a customer places an order you get an email notification, the order appears on the Orders page, and the customer receives a confirmation email.

2

Fulfillment = picking and packing the products, labelling the shipment and handing it to a carrier — Shopify tracks the status end to end.

3

The order Timeline records every event — payments, fulfillments, notes — and is your first stop when troubleshooting a failed capture or refund.

4

Day-to-day order management: tags and notes, contacting the customer, resending notifications, push notifications and archiving fulfilled orders.

5

Refunds can be full or partial, with optional restocking and customer notification — cancellations reverse the order entirely.

6

Consistent, timely order handling keeps the store content and inventory accurate and maintains customer trust.

When an Order Comes In

Fulfillment & Day-to-Day Management

1

Pick & pack

Prepare the items and package them for shipment.

2

Label & ship

Label the order and hand it to the mail carrier.

3

Timeline

Every payment and event is recorded — expand events to troubleshoot.

4

Tags & notes

Tag, annotate and archive orders to stay organised.

5

Notify

Contact the customer or resend order emails anytime.

6

Refund & cancel

Full or partial refunds, optional restock and customer notification.

Process, Fulfill and Refund an Order

LAB 5

Place a trial order on your own store using a manual payment method, then work the full order lifecycle in the admin — view the order and its Timeline, fulfill it, and process a partial refund.

You'll build

A completed order lifecycle: a test order that has been viewed, paid, fulfilled and refunded, with the Timeline recording every event.

Tools: Shopify admin — Orders, order Timeline, fulfillment, refunds

Lab 5 at a Glance

Process, Fulfill and Refund an Order

Test it

The order page must show Paid → Fulfilled → Refunded events on the Timeline, and the customer email inbox must have the confirmation, shipment and refund notifications.

 Full click-by-click steps: Learner Guide — this lab's Step-by-step section.

Recap — Managing Orders

- You can now: LO4 — Manage orders on Shopify store
- Key concepts: View · Fulfill · Manage · Refund and cancel.

TOPIC 05

Payment and Shipping

Payments · PayPal · Manual methods · Fraud · Taxes · Shipping · Dropshipping

Key Concepts — Payment and Shipping

1

Customers pay with any method you enable under Settings → Payments — Shopify Payments, PayPal, credit cards, wallets and manual methods.

2

PayPal Express Checkout is created automatically with your store email — activate it to start receiving PayPal payments immediately.

3

Manual payment methods (bank deposit, cash on delivery, custom) suit local markets — orders stay pending until you mark them paid.

4

Shopify's built-in fraud analysis flags suspicious orders — verify the IP, phone and email, match billing and shipping addresses, review high-value orders.

5

Configure taxes for every country and region you ship to; Singapore stores charge GST where registered.

6

Shipping strategy is a business decision: free shipping, exact carrier rates or flat rates — supported by product weights and default packaging.

7

Dropshipping and fulfillment services ship on your behalf — you price shipping by their fees, not the carrier's.

Ways to Get Paid

1

Shopify Payments

Built-in credit card processing — no third-party account.

2

PayPal

Express Checkout is auto-created with your store email.

3

Third-party gateways

Credit card providers beyond Shopify Payments.

4

Wallets

Apple Pay, Google Pay, Amazon Pay — one-tap checkout.

5

Manual methods

Bank deposit, cash on delivery, custom payment.

6

Alternative

Cryptocurrency and instalment providers.

Fraud Prevention — Check Before You Fulfill

1

Verify the IP address of the order

2

Call the phone number on the order

3

Search the email address

4

Match billing and shipping addresses

5

Watch multiple orders shipping to one address

6

Review high-value orders; install fraud apps

Shipping Strategies

Free shipping

- Build cost into product price
- Great conversion booster
- Or free above a threshold

Exact cost

- Live carrier-calculated rates
- Customer pays what you pay
- Needs accurate product weights

Flat rate

- Simple, predictable pricing
- Per order or per zone
- Easiest place to start

Dropshipping & Fulfillment Services

Model

- How it works
 - The service stores, prints or makes the product
 - They ship directly to your customer
 - You never touch inventory

Implications

- What changes
 - You price shipping from the service's fees, not carriers'
 - Print-on-demand often charges flat shipping fees
 - Focus shifts to marketing and customer service

Set Up Payment Methods

LAB 6

Configure how your store gets paid: activate PayPal, add a manual Bank Deposit method with customer instructions, set automatic payment capture and review Shopify's fraud analysis indicators.

You'll build

A store that accepts PayPal and Bank Deposit, captures card payments automatically, and a fraud-check routine for suspicious orders.

Tools: Shopify admin — Settings → Payments, PayPal, manual payment methods

Lab 6 at a Glance

Set Up Payment Methods

Test it

Your checkout must offer PayPal and Bank Deposit; the Bank Deposit order confirmation page must show your payment instructions; Settings → Payments must show automatic capture enabled.

 Full click-by-click steps: Learner Guide — this lab's Step-by-step section.

Configure Shipping Rates and Taxes

LAB 7

Plan your shipping strategy and implement it: add product weights, create a Singapore shipping zone with a flat rate, add free shipping for orders above \$200, and review tax settings for the regions you sell to.

You'll build

A working shipping setup — Singapore zone with a flat rate plus free shipping over \$200 — and taxes configured for your selling regions.

Tools: Shopify admin — Settings → Shipping and delivery, Settings → Taxes and duties

Lab 7 at a Glance

Configure Shipping Rates and Taxes

Test it

Checkout shows Standard Delivery (\$5) below \$200 and Free Shipping at/above \$200 for a Singapore address; product weights and tax regions are in place.

 Full click-by-click steps: Learner Guide — this lab's Step-by-step section.

Recap — Payment and Shipping

- You can now: LO5 — Manage payment and shipping issues on Shopify store
- Key concepts: Payments · PayPal · Manual methods · Fraud · Taxes · Shipping · Dropshipping.

TOPIC 06

Marketing and Performance

Marketing plan · SEO · Discounts · Analytics · Pixels · Newsletter

Key Concepts — Marketing and Performance

1

After launch, the job is traffic and conversion — a marketing plan chooses the tactics that fit your store and budget.

2

The 7-step marketing plan: define your message, understand customers, choose tactics, set goals, choose channels, analyse impact, repeat.

3

SEO raises your ranking for shoppers already searching for your products — keywords in page titles, meta descriptions, ALT text and body content.

4

Shopify automates canonical tags, sitemap.xml, robots.txt and social sharing; you optimise titles, descriptions, URLs and image ALT text.

5

Discount codes and automatic discounts (percentage, fixed, free shipping) drive promotions — with usage limits and active dates.

6

Store analytics measure performance: sessions, conversion funnel, top traffic sources and locations, sales attributed to marketing.

7

Google Analytics, Facebook Pixel and Google Ads conversion tags track campaigns; a newsletter app builds a repeat-customer email list.

The 7-Step Marketing Plan

Improve Your SEO

1

Find keywords

What search terms would your customers use to find you?

2

Place keywords

Page titles, meta descriptions, image ALT text, body content.

3

Clean URLs

Make URLs and filenames match the content.

4

Submit sitemap

Add sitemap.xml to Google Search Console for crawling and indexing.

SEO in Shopify — Automatic vs Yours

Shopify does

- Automatic
 - Canonical tags prevent duplicate content
 - sitemap.xml and robots.txt generated
 - Theme title tags include your store name
 - Logical content hierarchy, no iframes

You do

- You optimise
 - Title tags and meta descriptions
 - Image ALT text and descriptive filenames
 - Store navigation and internal link text

Measure What Matters

1

Sessions

Online store sessions over 30 days vs the previous period.

2

Conversion funnel

Sessions → add to cart → reach checkout → converted.

3

Traffic sources

Which websites and services send you visitors — and sales.

4

Traffic locations

Where your visitors are — target content and ads there.

5

Marketing sales

Sales and orders attributed to your campaigns.

6

Ad spend

What you spend on campaigns in Shopify and connected channels.

Campaign Tracking Toolkit

1

Google Analytics

Connect via the Google & YouTube channel app with your Measurement ID.

2

Meta / Facebook Pixel

Track standard actions from your store pages via the Facebook channel.

3

Google Ads tag

Conversion global site tag pasted into theme.liquid <head>.

4

Newsletter app

Mailchimp / Shopify Email / Klaviyo from apps.shopify.com builds your list.

Create Discounts and a Marketing Plan

LAB 8

Draft a one-page marketing plan for your store using the 7-step framework, then implement your first promotion: a discount code and an automatic discount with usage limits and active dates.

You'll build

A one-page marketing plan plus two live promotions — a LAUNCH10 discount code and an automatic spend-more discount.

Tools: Shopify admin — Discounts, Marketing page, marketing plan worksheet

Lab 8 at a Glance

Create Discounts and a Marketing Plan

Test it

Both discounts show as Active on the Discounts page; LAUNCH10 works at checkout and the automatic discount triggers at \$150; your one-page marketing plan states message, customers, tactics, goal, channels and how you will measure impact.

 Full click-by-click steps: Learner Guide — this lab's Step-by-step section.

Set Up SEO, Analytics and Newsletter

LAB 9

Make the store measurable and findable: tune SEO metadata with your keywords, connect Google Analytics, understand where the Facebook Pixel and Google Ads tag go, install a newsletter app and read the built-in performance reports.

You'll build

A store with keyword-optimised metadata, Google Analytics connected, a newsletter signup, and a review of the store's traffic and conversion reports.

Tools: Shopify admin — Online Store → Preferences, Google Analytics, Shopify App Store (newsletter app), Analytics reports

Lab 9 at a Glance

Set Up SEO, Analytics and Newsletter

Test it

Google Analytics Realtime shows your own visit to the storefront; the newsletter signup accepts a test email; you can name your store's top traffic source and the weakest step of the conversion funnel from the Analytics reports.

 Full click-by-click steps: Learner Guide — this lab's Step-by-step section.

Recap — Marketing and Performance

- You can now: LO6 — Develop and review Shopify store marketing and site performance
- You can now: LO6 — Develop and review Shopify store marketing and site performance
- Key concepts: Marketing plan · SEO · Discounts · Analytics · Pixels · Newsletter.

WRAP-UP

Course Summary & Next Steps

What You Achieved

1

Store & CMS

Set up a live Shopify store with correct configuration and metadata.

2

Products

Curated product pages with variants, images and SEO listings.

3

Theme

Published and branded a theme — collections and a contact page.

4

Orders

Processed the full order lifecycle: view, fulfill, refund, archive.

5

Pay & ship

Activated payments, planned shipping rates and reviewed taxes.

6

Marketing

Launched discounts, SEO, analytics and a newsletter — and read the reports.
